

Dear Parents/Carers,

This half-term, the children in Year 5 will be undertaking a food technology unit as part of their Design and Technology curriculum. They will be creating a product using seasonal ingredients and this week we are at the 'Test and Design' stage.

On Thursday 19<sup>th</sup> September, our class will be taste testing potential ingredients for their product. We are asking for a voluntary contribution of £1 which will cover the tasting session and the basic ingredients for the final product in a few weeks.

We will be providing the food for the taste tests (all are subject to availability).

This includes:

- Apples
- Baby corn
- Damsons
- Plums
- Sloes
- Blackberries
- Pears
- Rocket
- Watercress

If there are any queries or further things you would like to discuss, please contact the office or email: [info@maidens.dudley.sch.uk](mailto:info@maidens.dudley.sch.uk).

Thank you

Mr Brookes
